## Farm Tours and Event Center

We are open for tours spring through summer and into early fall. All ages are welcome and they can be so much more than a walk around the farm. Educational lessons are offered that are connected to Ohio's academic content standards. Of course, ice cream is served at the conclusion of all tours.

Our event/activity center is an ideal location to begin and end tours, plus it is available for groups up to 150. It includes a full kitchen, seating, a cozy sitting area for socializing, and a wood burning stove for cooler days. Contact us for availability, reservations, costs, and any other questions you would like answered.

# Meet the Ayars

Our farm is nestled in the rural landscape of Ohio, near the small village of Mechanicsburg. Our cows are the focus of life and we take pride in providing them quality care. In fact,

some of them are quite famous having won championships at the Ohio State Fair and also at national shows across the country. Even television stations and crews have visited the farm to film our 'girls' in their natural surroundings!

There are many challenges involved on a working family farm, but that doesn't stop us from creating a quality product, in fact, that's our #1 goal! We are an authentic dairy and interact personally with each cow whose milk is used in our ice cream. The family atmosphere and commitment is what makes this ice cream special, it's the most important ingredient in every flavor you sample.

## Ice Cream:

Many of our ice cream flavors are named for special Guernsey cows that have been a part of our farm and our lives. In fact, every Guernsey has a name on their registration paper similar to a birth certificate. Not only do we produce the ice cream at our farm, but we also know every cow whose cream goes into that container!
